Education

University of Waterloo
BSc in Honors in Computer Science

Waterloo, ON
Sept 2024 – Apr 2028

Experience

Software Engineer Intern

Shopify

Toronto, ON

May 2026 – Aug 2026

- Resolved **polling bugs** by auto-creating new suspension requests instead of throwing transient failures, and built a system to surface explicit **JS runtime** and **schema-mismatch errors** to users.
- Enforced a **20-recipient email cap** by building multi-layer validations across a **Ruby on Rails** backend, **TypeScript** frontend, and connector layers; prototyped embedded Shopify Admin **UI Intents**.

AI Consulting Intern

EY (Ernst & Young)

Toronto, ON

Feb 2026 – Apr 2026

- Architected a **multi-agent synthetic data engine** using **LangGraph** (Schema Analyst, Orchestrator, Generator, Executor) to automate testing stubs for enterprise business transformations.
- Developed a **Streamlit UI** featuring **negative data injection**, anomaly detection, and agentic feedback loops.
- Engineered **SSO integration** via **Azure APIM** and **Microsoft Entra ID**, unifying disparate AI frontends and backend services into a centralized, gamified interface.

Software Engineer Intern

Wipro Limited

Reading, UK

May 2025 – Aug 2025

- Engineered a scalable onboarding assistant on **AWS EC2** using **Python** and **Docker**, automating workflows for **1000+ hires** and cutting onboarding time from **7 to 4 days**.
- Built an **AI pipeline** for 500+ maintenance documents using **RAG** to enable natural language queries, reducing resolution time by **40%**.
- Developed an **LLM HR chatbot** using vector databases and **Java enterprise integration**, enabling semantic search and reducing manual support tickets by **60%**.

Projects

OffsetAI - Multi-Agent Financial Platform

Jan 2026

- Developed an autonomous investment assistant using **Next.js**, **FastAPI**, and **LangGraph** to synthesize market data and private portfolios into actionable trade signals.
- Architected a **self-correcting multi-agent system** to validate market trends against live betting odds.
- Engineered a **Privacy-First RAG engine** using **Pinecone** and **MCP** to securely analyze local portfolio data.

GoFish - AI Fishing Platform (Delta Hacks Winner)

Jan 2026

- Developed an **AI fishing assistant** with **Next.js + FastAPI** providing species identification and recommendations.
- Architected a **PyTorch/CLIP CV pipeline** achieving **92% identification accuracy** with **sub-200ms latency**.
- Engineered a recommendation engine synthesizing **GeoJSON** and **METAR weather telemetry** to calculate dynamic 'Bite Scores'.

Skills

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, C++, HTML, CSS

Frameworks: React, Django, FastAPI, Next.js, LangGraph, PyTorch, LangChain, Scikit-learn, XGBoost

Extracurriculars

- Hack the North:** Volunteer Organiser | **Delta Hacks 12 Winner**
- Content Creator: Managed an Instagram account with **300K+ monthly views** (@abeer.daily1)
